

# Hacken Extractor

Post-deployment Security Solution for Attacks  
Detection and Prevention

“\$1 billion was spent securing smart contracts in 2022, yet [\\$4 billion was hacked last year.](#)”

### Attack Types

# What is Hacken Extractor Today?

HACKEN

The screenshot displays the 'Request Hacken Services' web form. On the left is a dark sidebar with the 'EXTRACTOR' logo, a list of contracts (e.g., 'Cool Coin Smart C...', 'NFT Project Contract'), and navigation links for 'Hacken Services', 'Manage Contracts', and 'Support'. The main content area is titled 'Request Hacken Services' and features a 'Select Service' section with four options: 'Smart Contract Audit', 'Confirm Audit', 'Monitoring Setup by Hacken' (which is selected and highlighted with a green border), and 'More Coming Soon'. Below this is a 'Details' section with input fields for 'Your Name', 'Company Name', 'Corporate Website', and 'Details & link to smart contract source code'. An 'FAQ' sidebar on the right lists questions about the monitoring setup. At the bottom, there's a 'Your Contact' section with an email field and a 'Submit Request' button.

**FAQ**

- What is Monitoring Setup by Hacken?  
It is a turnkey service of monitoring setup by our professional auditors team
- What's the process of Monitoring Setup by Hacken?
- What are benefits of Monitoring Setup by Hacken?

## Competitive Technology

- Attack Detector spotted most of the recent hacks
- Setup flexibility for each project

## Proven Traction

- 140 Beta Users
- 100+ Smart Contracts Secured
- 10 Annual Clients within first month

## Hacken Expertise

- Auditors and Security Researchers in core team

# How Does It work?

HACKEN

## Security Monitoring of Smart Contracts

Detecting Attacks and Hacks by monitoring and defining suspicious accounts and smart contracts on chain

## Advanced Monitoring of Smart Contracts

Setup additional triggers depending on projects types that are detecting suspicious events across the Smart Contract

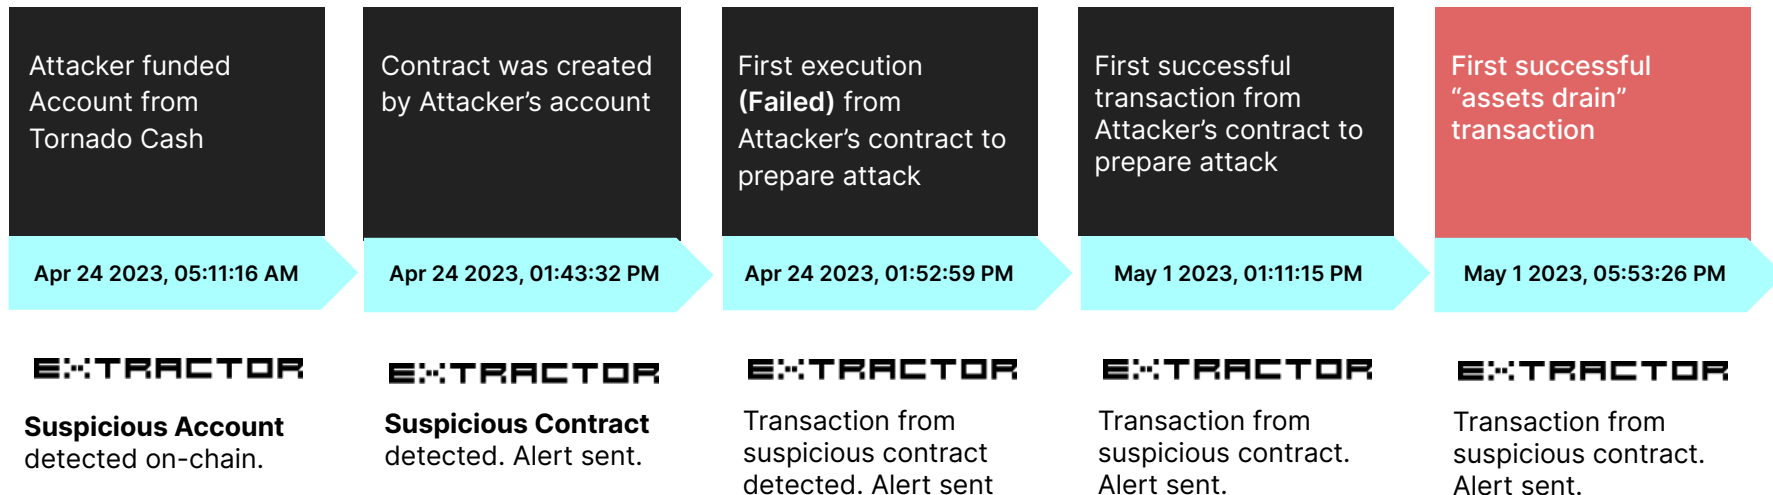

## Hacks Prevention Mechanisms

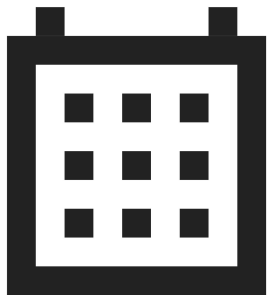

From no code to full integration mechanisms that allow automated response to incidents to mitigate risks or completely prevent exploit

The screenshot displays the HACKEN Extractor dashboard. On the left is a dark sidebar with a menu including 'Cool Coin Sm.', 'Dashboard', 'MONITORING' (with sub-items: Security Monitoring, Advanced Monitoring, Smart Contract Actions), and 'OTHER' (with sub-items: Hacken Services, Documentation, Support, Settings). The main content area has a red header with a 'High Severity event detected' alert for contract 0xdAC17F958D2ee523a2206206994597C13D831ec7, showing 0 days without incidents. Below this are three monitoring cards: 'Attack Detector' (No attacks detected, Last 7 days), 'Contract State Monitoring' (No contract changes, Last 7 days), and 'Blockchain Monitoring' (Extractor monitors blockchain 24/7 to prevent hacks). At the bottom, statistics show 1124 blocks analyzed, 1124 malicious smart contracts found, and 424 suspicious accounts detected. A white modal on the right shows an 'Interactions Analysis' alert for a 'Suspicious Interaction Detected' 7 minutes ago (24 Apr, 01:43:32). A notification bubble at the bottom left shows a 'Suspicious Interaction Detected' alert from Hacken Extractor 1 hour ago.

**Tuesday, May 2, 2023 \$1.1M in referral rewards were robbed from the BSC-based perps platform.**

If Hacken Extractor was in place, it would prevent hack  
7 days beforehand and save \$1.1M funds

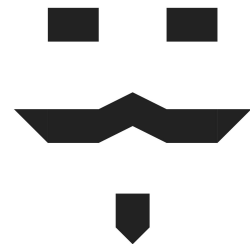

### **Perfect Timing for Connection**

Effective protection has to be implemented inside the contract. Right after an audit!

### **No Customer Acquisition Cost**

Extractor is an essential need and perfect upsell for every Hacken Client

### **Setup Service Included**

Client saves development resources as during the audit Hacken Experts setup triggers and protection mechanisms

**Hacken Extractor will become  
sophisticated Post Deployment  
security solution that will ensure  
multi level assets protection of  
Defi world.**
